BASE MODEL 11ST42TT1 SHOWN

Bonnell High Country Torsion Trip Snow Plows are designed for removing snow at high-speeds in rural areas and interstate highways. The standard extended roll moldboard is designed to move the snow to the discharge end of the plow more efficiently. This prevents the snow from blowing over the top of the plow.

Bonnell's many standard features are what set us apart from our competition. Our torsion-trip cutting edge is designed with [4] 3/4" spring wire torsion trip springs, each of which are independently replaceable without removing other springs or hinge pins. The moldboard has [2] adjustable pitch settings,

allowing you to regulate the attack angle of the cutting edge. The lower reinforcing angle has [5] hinge ears welded along its bottom provided for attaching the trip lower trip section.

Plows are available with steel or poly moldboards. Other options are also available [see page 2].

Meeting the demands of Mother Nature in the winter is a tough job. You need a tough plow to get you through the harshest conditions. Bonnell High Country series snow plows will clear the way.

Spring Wire Diameter: 3/4" [7/8" optional]
 Number of Springs: 4
 Adjustable Moldboard Pitch Settings: 15° or 5° off vertical
 Lower Reinforcement Angle: 4" x 4" x 1/2"
