

QUICK -N- EASY SHOULDER CONDITIONER

ROAD MAINTENANCE

FEATURES & BENEFITS:

- One person operation
- Uses your existing truck equipment
- Uses existing hydraulics
- Simple one point attachment
- Adjustable from 16" to 38"
- Salt auger directs material
- Accommodates most materials
- No waste of materials
- Unit follows road contour
- Pitch and grade is adjustable
- Truck compacts shoulder
- No need for extra equipment

The Quick-N-Easy Shoulder unit leaves a clean uncompacted shoulder that requires no other equipment to clean off the road. The truck can compact the shoulder by driving over the newly laid shoulder saving you time and money.

The Quick-N-Easy Shoulder Conditioner allows even distribution of multiple types of materials, including dirt, gravel, and asphalt.

Optional berm chute available and customizable to fit on your dispersal equipment.

The old adage “necessity is the mother of all inventions” is how the **Quick -N- Easy Shoulder unit** was born. You see, when a municipal maintenance professional logs over 25 years of shoulder repair, he envisions a **simpler** and more **efficient** means of performing shoulder work. Take a closer look at the pictures of the patented design of the Quick -N- Easy Shoulder unit and you will see the thoughtful use of existing truck equipment and hydraulics, the simplicity of the design and the efficiency of **single person operation**. In short, you may wonder why the patented Quick -N- Easy Shoulder unit hasn't been invented before now! The patented Quick -N- Easy Shoulder unit is a model of efficiency. If you are currently employing a sub-contractor to

do your shoulder work, the Quick -N- Easy Shoulder repair unit can pay for itself in just a few linear miles of shoulder repair work! Our number crunching has showed that your ROI will happen **faster** than most equipment purchases. When compared to other means of fixing shoulders like using County Highway Departments, the Quick -N- Easy Shoulder repair unit will **save you money** in short order. Furthermore, even if you do the work internally out of your own garage, this patented unit eliminated the need for extra equipment such as a snow plow, grader, roller, broom and extra personnel, again saving you money.
